CITY CLERK

I am writing today to because I have my sewage bill and it is showing that I am being charged on average over \$200 a month and I have asked them why this is. They keep telling that it is based on my water usage and water says that it is what the city charges. The issue that I have with that is my water bill is only an average of 75\$ a month. How is it that I am having a sewage bill that is so much? I am currently past due and have a disconnect on my water, (which is not right because the two are no longer combined into one bill) on it because I cannot pay that amount plus my other house hold bills that need to be paid. I feel as a tax payer that I am being cheated. When the sewage and water were together my bill was NEVER this high. I am very upset by this and feel that something need to be done about it.
